

DATU HASMIN IBAD

WEB DEVELOPER

PROFILE

As an IT individual aspiring to specialize in web development, I bring a solid academic foundation in programming languages, web technologies, and design principles. Despite not having professional experience, my passion for making dynamic and user-friendly websites fuels my commitment to learning and adapting to the challenges of the job. I am eager to contribute to a dynamic IT team and confident in my ability to quickly grasp new concepts and technologies. My goal is to leverage every opportunity to enhance my skills and make meaningful contributions to innovative web development projects.

PROJECTS

Mobile Shop Management System

2023

ReactJS

Mobile Shop Management System Description: Developed a modern Mobile Shop Management System using ReactJS for the front-end. This system provided a user-friendly interface for managing inventory, processing customer orders, and tracking sales. Implemented dynamic product listings, real-time stock updates, and an intuitive checkout process. Utilized React's component-based architecture for efficient development and responsiveness.

Dormitory and Hostel Management System

2023 - 2024

Laravel and React Native

Description: Successfully designed and implemented a comprehensive Dormitory and Hostel Management System to streamline operations, utilizing Laravel for the web application and React Native for the mobile platform. This system ensures seamless communication and synchronization through a unified database. The web platform provides administrators with features for room allocation, student management, and facility maintenance. The React Native mobile app extends accessibility, allowing students to check room assignments, report issues, and receive important notifications

WORK EXPERIENCE

Stronghold Insurance Company Inc.

2024
